Health of Student One Of First Prerequisites

The first assignment for parents, as school opening nears, is checking the youngsters' well-being.

Is the boy or girl physically fit to face the challenges of the school year ahead?

Now's the time to check eyes, ears, teeth and a child's total health.

HOW ABOUT EYES? Every child should have an eye test once a year. If your child has had trouble in school, make very sure you get both his vision and hearing checked. No child can learn well if he cannot see the blackboard or hear the teacher clearly.

How about weight and nutrition? Has your youngster gained enough and not too much? Maybe you need to plan his diet more carefully — too many snacks and not enough muscle building staples. Maybe it is a little extra sleep he needs.

DON'T FORGET the child's teeth. Plan an early visit to the dentist; have needed dental work done well ahead of Fall.

Be sure that the youngster has all essential preventative vaccine shots. Check with the doctor on what's new and necessary.

Consider the child's posture,

too. Are his muscles firm and strong? His coloring good?

DON'T OVERLOOK securing professional help for the child who sucks his thumb, wets his bed, or dawdles over food and chores. Some of these problems are emotional, others have a physical origin.

Plan appointments for each of the children in the family well in advance of school opening. Be sure ample time is available for proper care and treatment of physical and emotional problems.

Car Strikes Street Sign

Jerry Johnson, 17, of Palos Verdes Estates suffered minor injuries Saturday when his vehicle struck a street sign near Monte De Oro and Paseo De Las Estrellas in the Riviera.

He was treated at Little Company of Mary Hospital and released Sunday. Johnson said he was pushing his car with one foot backward out of a driveway when the gas pedal apparently stuck and the car shot across the street, striking the street sign. Johnson was laying on the ground beside the vehicle when police arrived on the scene.
